

Wave Picnic Table

Product Code: WYWMP6

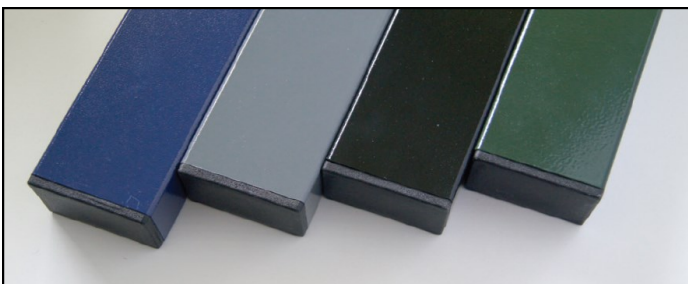

Height	730mm
Length	1950mm
Depth	1400mm
Weight	150 kg
Construction Material	Galvanised Steel

The Wave Picnic Table is manufactured from pre-galvanised welded box section steel and can be powder coated in a choice of colours.

The wave shape of the bench makes it difficult for skateboarders to perform tricks on it, therefore helping to prevent anti-social behaviour. The end of each slat features a plastic bung to keep water and dirt out. Alternatively welded box section end caps are available if preferred.

The feet come pre-drilled ready for ground fixing using RAWL bolts or the picnic table can be supplied with extended legs for concreting directly into the ground.

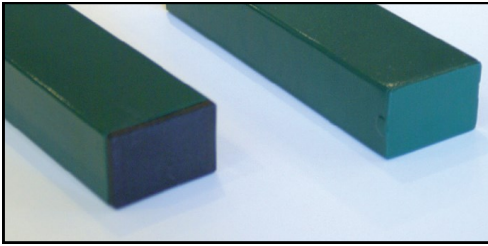

Steel Colours

The Wave seat I powder coated in one of our standard textured paints free of charge.

If you require a colour that is not among our standard colours, please contact us as more colours are available upon request.

Optional Extras

Welded Box Section Ends

An alternative to the standard plastic bungs.
