

Oil Selective Absorbent Booms - OSB4-120

These booms allow you to respond quickly to emergency situations and they can of course be deployed proactively in spill prone areas such as outfalls or on settling ponds. The method of construction prevents the booms from falling apart under the weight of the absorbed oil and the recovery line also acts to prevent the booms from twisting. Rust proof end rings and carabiner clips are fitted as standard to allow you to join additional booms securely.

SPECIFICATION

Size	13cmØ x 3m
Absorbs	Hydrocarbons but repels water
Capacity	30ltr per boom - 120ltr per pack of 4
Colour	White
Pack weight	8.6kg
