WE27520310220	Black	x3	7mm	No	1200mm	800mm	150mm	12 kg	HDPE
WE27520330220	Black	x3	22mm	No	1200mm	800mm	150mm	12 kg	HDPE

The IKP 1208 pallets are available in three versions and are manufactured from regenerate High Density Polyethylene (HDPE). The pallets are extremely robust, dimensionally stable and secure for high load capacities. The pallets are used in a wide range of locations such as:

Retail/Market Chains

**Chemicals/Pharmaceuticals/
Cosmetics**

Logistics

Packaging

Please note these pallets are not suitable for use in food industries as they are manufactured from recycled material.

Pallet Features

Manufactured from regenerate HDPE plastic

Open runner system with 3x non-welded runners

Anti-slip edges available on two versions

Excellent cleaning properties

Stable at temperatures ranging from -30°C - +60°C

5000 kg static load carrying capacity*

1000 kg dynamic load carrying capacity*

400 kg limit when used in a racking system*

***Static Load** - The pallet is in contact with a level floor and has an evenly distributed load

***Dynamic Load** - The pallet is picked up by a forklift truck on either the long or short side and has an evenly distributed load

***In a Racking System** - The pallets stand on the short side of the runners or the long sides of the runners, level for 100 hours with an evenly distributed load.
